

Press Release

September 25, 2006

ASCIO is announcing a collaboration with strategic partner CommGeniX, <http://www.commgenix.com/>, a progressive, full-service medical education company with its corporate headquarters in Tampa, Florida. CommGeniX specializes in CE/CME programs (live symposia, multimedia, and print) in the areas of oncology/immunology, pharmacotherapy, and orthobiologics. Ascio will benefit from CommGeniX's national network of strategic partners and professional educators with years of experience in science, technology and medical communications. This relationship allows Ascio access to commercialization expertise and resources in a variety of settings, including clinical institutions, universities, and private industry.

CommGeniX's mission is to use both traditional and emerging communications technologies to be the premiere resource for information and education in the field of medicine, targeting efforts to the health care professional, educational institutions, corporate entities, and the patient. This mission is accomplished by accessing their national network of strategic partners and professional educators with years of experience in science, technology and medical communications. CommGeniX partners and educators have real-world experience in a variety of settings, including clinical institutions, universities, and private industry. CommGeniX programs gain their credibility and richness of content by using an integrated approach, blending the strategic marketing goals of clients with the potential of a product in the medical, scientific and lay communities. This approach enables program development that satisfies the informational needs of an extensive audience in a cost-effective manner.

ASCIO Pharmaceuticals, LLC, is a startup specialty pharmaceutical company focusing on products prescribed by a relatively small specialist physician base treating relatively small patient populations. Therapy targets include highly potent compounds used to treat chronic or long-term disease states
